App IA

This is the information architecture for the mobile app.

The main goal of the app is to provide residence was services on the go, such as sports sign up forms, reporting, and more.

The business and government pages will be strictly information only.

Making Paper Prototypes

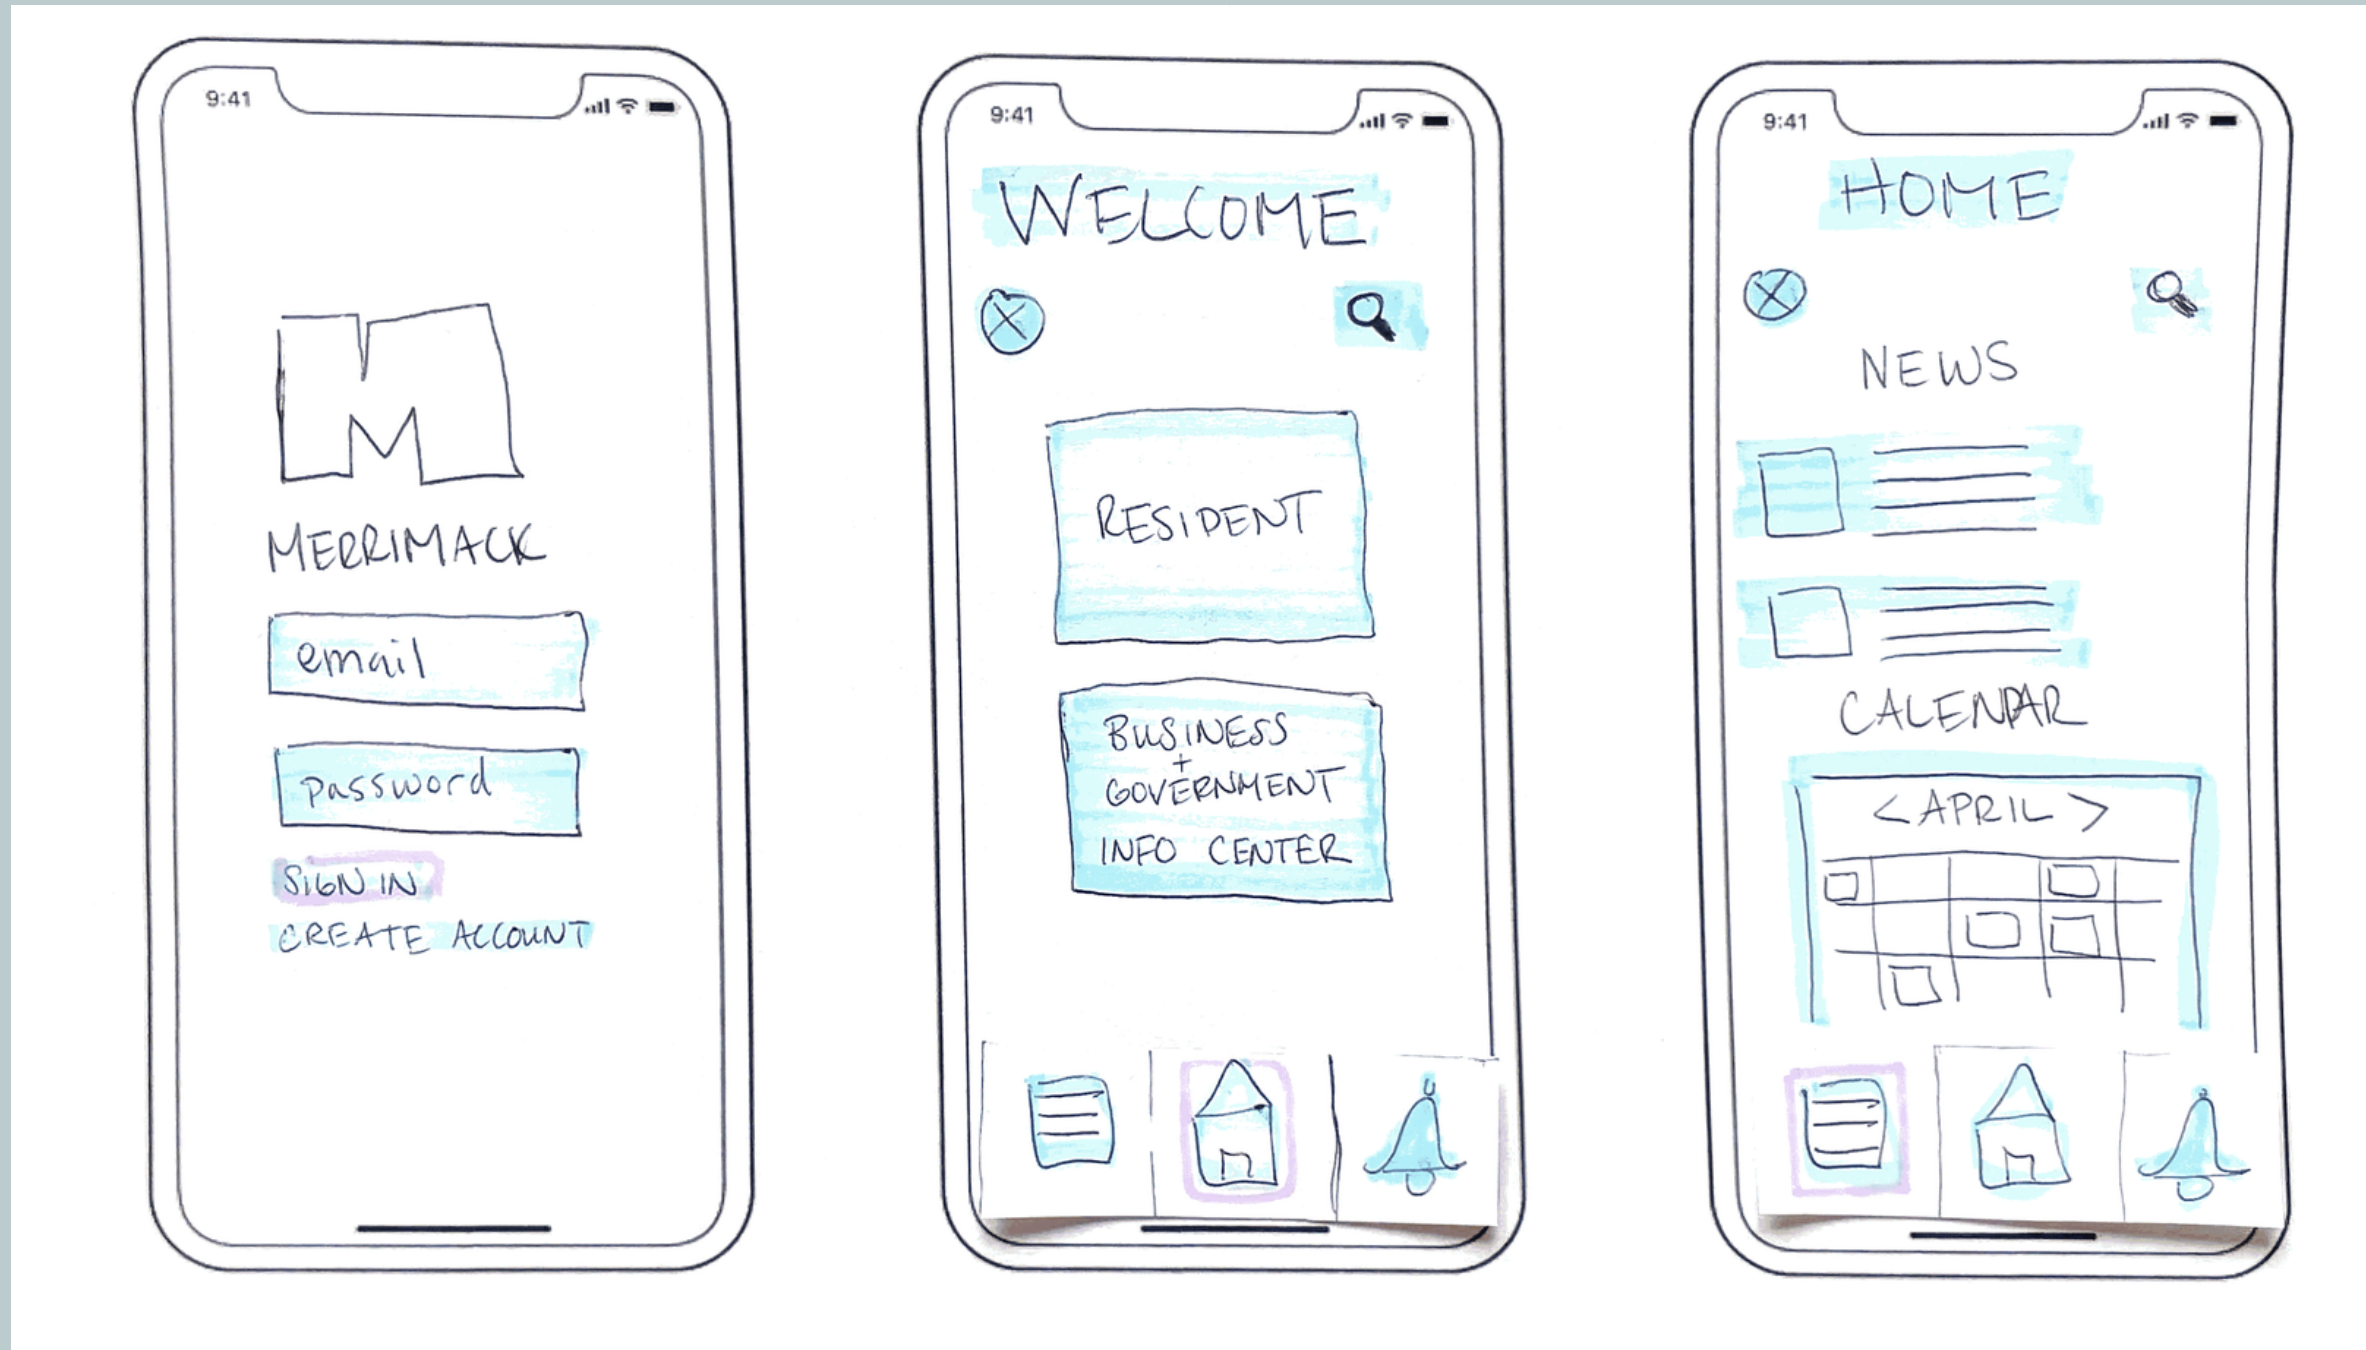

This week I focused on creating paper prototypes for my app idea. I made pages for some of the high traffic areas. This allows me to get an idea of what the app is going to look like, and if I need to app or take away any information.
